

Copy-editing by Wordy®

If you're looking to optimise your content at a fixed low price Wordy offers a real-time, comprehensive copy-editing service.

Our professional editors will help you create great reading content, avoid costly errors and even reduce your cycle time by 30 per cent or more.

Wordy's copy-editing service includes:

- Flawless grammar, spelling, punctuation, consistency and structure
- Free, instant price quote
- One-click ordering
- Professional, first-language copy-editors in all major time zones
- Free, instant approximate delivery time
- True real-time service, 24 hours a day.

Use Wordy to create consistent, on-message content, free up human resources and manage your professional and personal brand in writing.

Featured copy-editing clients

What is copy-editing?

Copy-editing is Wordy's basic product and a more detailed process than proofreading. Our editors check for correct grammar, reliable punctuation and correct spelling, but also the internal consistency and logical structure of the text and suggest alternative words.

What is a copy-editor?

A copy-editor is a language professional with a deep understanding of the written language, a well-rounded professional background and a relevant education.

A copy-editor's job is not to alter the meaning of a text but optimise the text to convey its message as accurately as possible.

Introduction

Today most governments are focused on understanding the economic growth they can countrely on, and take strong measures they-also-will-go-through important-measures-to keep-sustain this growth-alive. Why are they so foc comes-is very clear that most governments see in-growth as problems: e-can get-out-of-reduce their d social coping countries to-can address ges and is also clearly demonstrates that growth approach is just only not politically feasible.

But as much as growth can-beis an answer to the-above-mentionedse issues, it is-also often creating-creates its own problems, due to unsustainable patterns like-such as the creation of bubbles, the overuse of natural resources, and the environment. This implies that we need to better understand based-onuse this understanding to reconfigure growth in a w OPEN 24 HOURS A DAY sustainable.

Reconfiguring Growth

To reconfigure growth, we need to look in depth at these challenges and limits. Furthermore, it is also clear that only those facts- those-which-that are commonly agreed on-and shared- can be a real base-basis for change. If-we-are-not-doing-soOtherwise, we will not see the limits to-growth and we will be like a-driver-running-withsomeone driving at 200 km/h towards a wall,-he-can-not yet seen but that is just around the corner.

Before looking in depth at these limits of-to growth, we need to better understand some-of the-basic human nature and behaviour, which that-is-addings to the challenges to-suchfor
